Introduction

This index was compiled to enable users to locate documents in the Higher Education collection. A resume, consisting of a full bibliographic citation, an abstract, and a list of descriptive index terms, was prepared by the Central ERIC Staff for each of the 1000 documents in the collection. The document and resume were put on microfiche, copies of which were sent to each of the thirteen Clearinghouses in the ERIC system and to all Regional Educational Laboratories.

The index is organized in two parts: Part I contains a word list compiled from the index terms generated from the 1000 documents in the collection. The four-digit numbers listed beneath each term correspond to the last four digits of the ERIC document number, i.e., 0001 is document number ED 000 001. Part II contains a sequential listing of each document by ERIC document number, ED 000 001 through ED 001 000, with a complete bibliographic citation for each document.

To obtain documents referenced in this index:

1. Determine the subject to be searched. You want, perhaps, to look at the documents containing information about the administration of student placement.

2. Locate the appropriate terms in the subject index. For this particular topic, you would look up administration, students, and placement.

3. Coordinate the terms with the document numbers. The terms administration, students, and placement all list the numbers 0005, 0206, and 1763.

4. Match the relevant document numbers with the bibliographic citations in Part II.
